Yes we are using same login system. The only thing is the token for some of the entries is empty. That means you don't need to specify. Token is horrible it is binary if you have managed to copy as you have done for Gold King Mine Blowout do so. The login is not dynamic and until we make it so manual is the best way. I'm looking for way to make this as view and dynamic after this events.

The viewer now needs the popup url to be changed the new SADIE Gold King URL is https://r8.ercloud.org/sadie_GoldKingMine. The EPA Administrator is going to Durango so people are clamoring for data through SADIE.

Red and Bonita RV is empty, so why keep it in the SADIE dropdown list?

There are two scribe projects in SADIE that have no contents: Red and Bonita RV and R08_Gold King_Analytical. Is this correct?
